**BRIEF CURRICULUM:**

I was born in 1996 in Bihar, India. I did my graduation in Electrical Engineering in June 2018 from BTKIT, Dwarahat, Uttarakhand, in India. I received my master's degree in the department of Material Science in October 2022. The thesis was in the field of RF and microwave, and it is entitled "Improved empirical formulas for microstrip based RF circuits designed on magneto-dielectric substrates." After that, I joined the Microwave Lab as a Ph.D. student, working on the novel integrated RF and mm wave components for beyond 5G networks.
